

BirdDog Cloud StreamDeck plugin

How to use BirdDog Cloud StreamDeck plugin.

1. Double click on the plugin to add it to StreamDeck.
2. Add an API token under →more→Api Tokens and copy out the token.

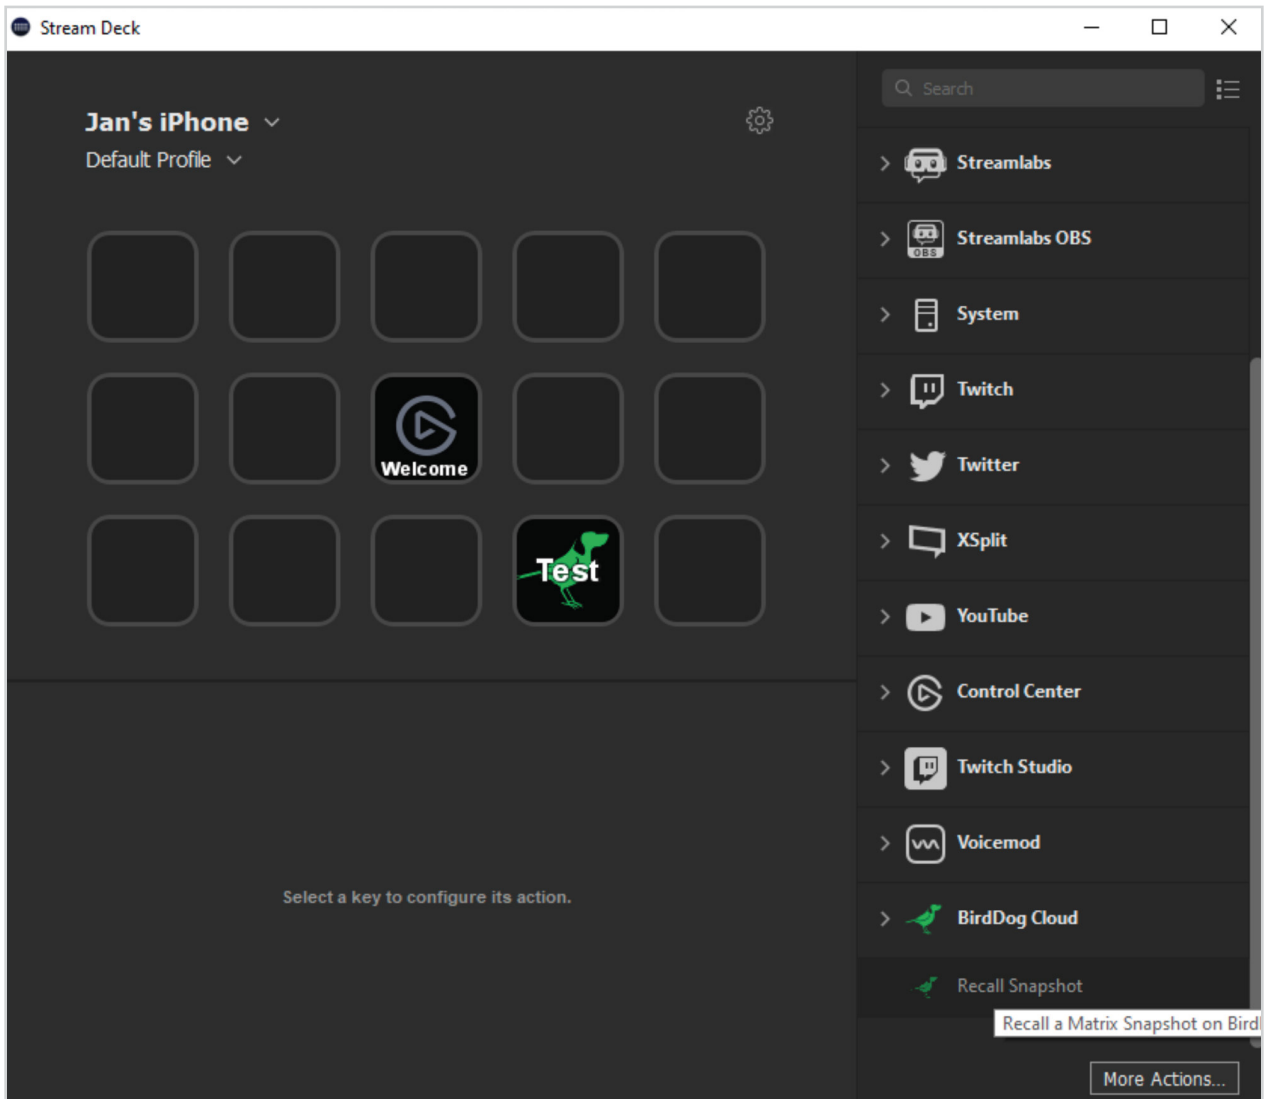

3. Create a Snapshot in BirdDog Cloud that you want to recall.

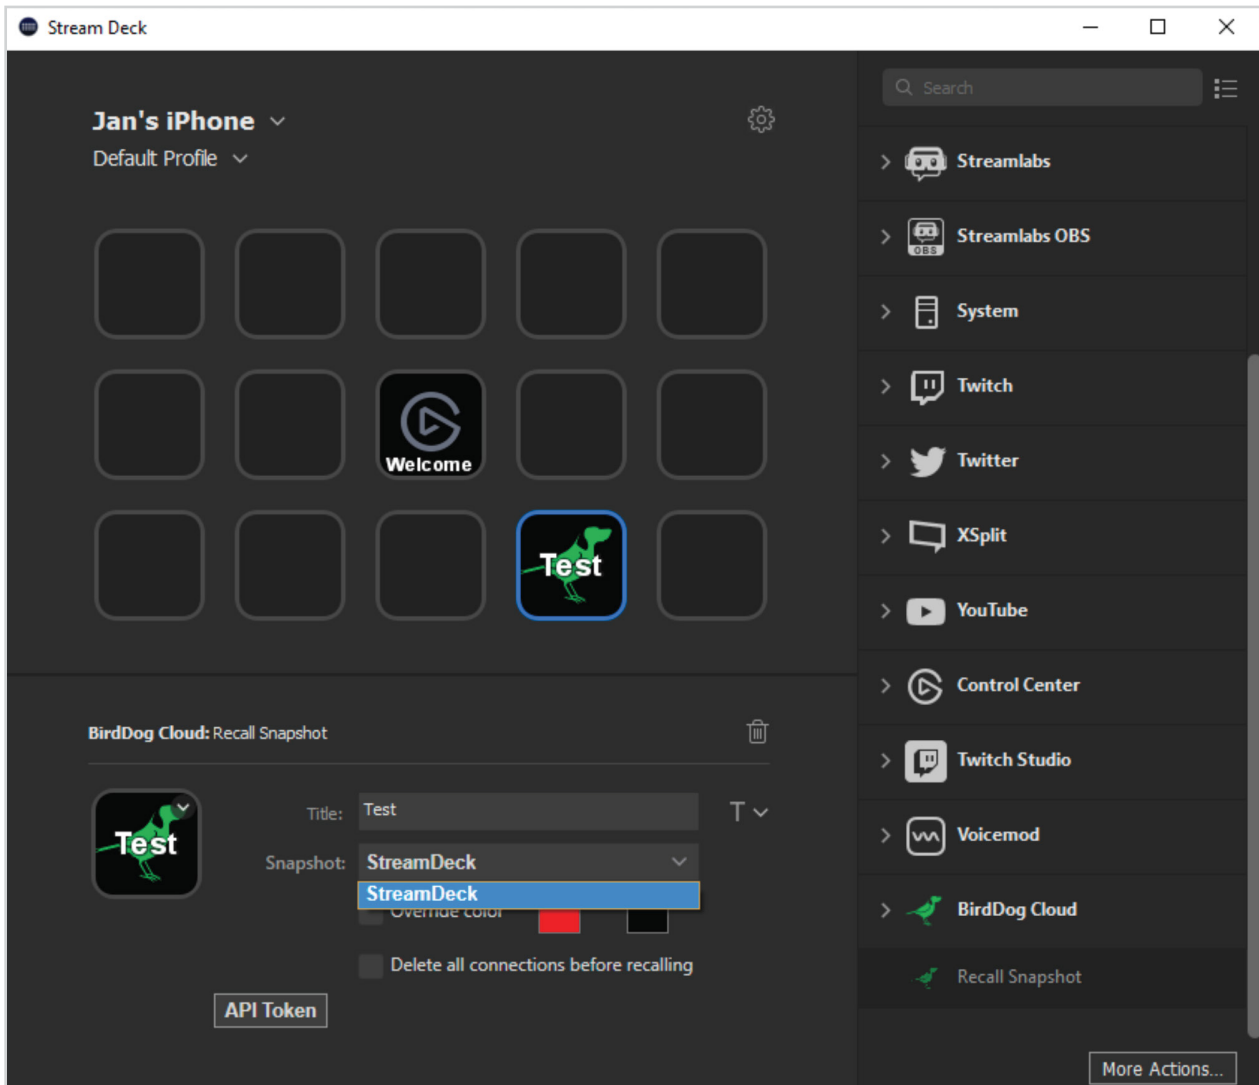

4. Drag the Recall Snapshot to the button you want to use and title it.

5. Add the API token (only have to do this once).

6. After a short time the API is called and you can select the Snapshot in the Snapshot dropdown.

7. Click the button on your StreamDeck panel to recall the snapshot.
