

Release Notes

BirdDog Central 2.0

NOTE: Due to internal BirdDog requirements, our public releases don't always have sequential numbering.

Version 2.0.5.1

This release fixes an issue that was causing Router video previews to freeze.

PREVIOUS RELEASE NOTES

Version 2.0.5

This release includes the following new features and changes:

- Generator playlists now support files with different frame rates.
- The MediaConverter output folder path has been changed to C:\Program Files\BirdDog\Central2.0.
