Release Notes

BirdDog Cam Control

NOTE: Due to internal BirdDog requirements, our public releases don't always have sequential numbering.

Version 3.2.5.6

This release includes the following new feature:

- Added support for the BirdDog X120 camera.

PREVIOUS RELEASES

Version 3.1.5.1

This release includes the following new features:

- Added support for BirdDog P110, P120 and P240 cameras.
- New Loupedeck plugin (beta).

  The BirdDog Cam Control Plugin for Loupedeck is an application profile for Loupedeck. Our plugin provides actions for Loupedeck buttons, and adjustments for Loupedeck dials, that map directly to the controls in BirdDog Cam Control.

Version 3.0.4

This release fixes an issue that was preventing Tracking from launching on some PC configurations.
