USING BIRDDOG NDI CAMERAS WITH ZOOM ROOMS
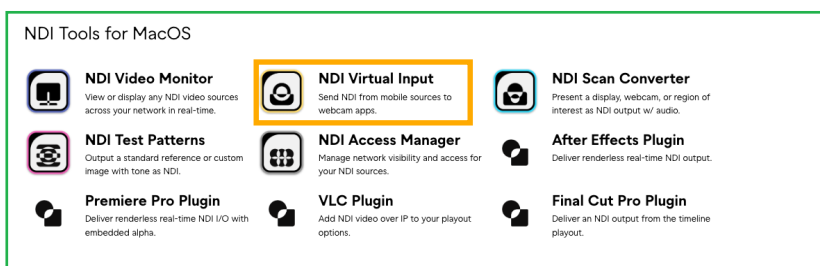

QUICKSTART GUIDE

MAY 2023

NDI

Introduction

This quickstart guide shows you how to use an NDI source – in this case, your BirdDog NDI camera, as your Zoom Rooms camera.

Procedure

1. Download and install **NDI Tools**.

   NDI Tools is a free suite of useful apps that help you with all aspects of NDI connectivity. We will use one of the included tools, **NDI Virtual Input**, to input your BirdDog NDI camera.

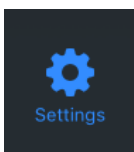

2. Start the **NDI Virtual Input** app. The icon will reside in the application bar.

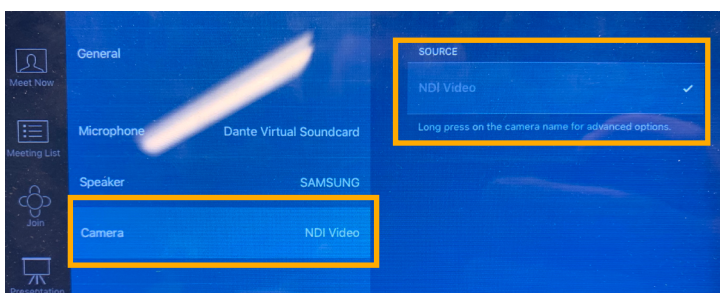

3. NDI sources will be automatically detected by **NDI Virtual Input**. Click the **NDI** button and select your camera from the dropdown list.

4. In Zoom Rooms navigate to the **Settings** tab.

5. Press the **Camera** menu item and select **NDI Video** as the Source. You should now have access to your BirdDog NDI camera.

WELCOME TO THE FUTURE.
