

## Firmware Release Notes

### BirdDog PF120

NOTE: Due to internal BirdDog requirements, our firmware releases don't always have sequential numbering. However, all our public releases are listed in this Release Notes document.

To upgrade the firmware, please follow the **Firmware Upgrade Instructions** located in your firmware download folder.

Firmware can be downloaded from our website via the following link:

#### Firmware 4.5.3796-LTS

This release fixes an issue with an audio level mismatch when the input audio is looped.

NOTE:

Camera presets will need to be reset after updating the camera firmware.

## PREVIOUS RELEASE NOTES

### Firmware 4.5.3793-LTS

This release includes the following new features and bug fixes:

- Fixes potential stability issues found with some software decoders on particularly challenging video frames.
- High-frequency (extreme detail) bitrate management optimisation.
- New optimised video codec provides overall improvements to video processing and image quality.
- Improves the video quality of the proxy stream.
- Optimises VISCA and NDI control.
- Fixes minor Web UI bugs.
- Fixes an issue with the camera switching into Extended video mode on start up.
